

GENERAL CATALOGUE 2022

**ATLANTIS
IS AN ITALIAN BRAND
SPECIALIZED IN DESIGNING
AND MANUFACTURING
HIGH-QUALITY
HEADWEAR SINCE 1995.**

2022 CONCEPT

Journey is the word that best identifies **our path to sustainable business.**

Like every journey, we have been influenced by the natural elements we encountered on the road and, designing the new collection, we were inspired by the beauty and the purity of nature, associating each piece of headwear with a symbolic place of this beauty to be preserved.

Designing sustainably can be a challenge, but it's essential to support a healthier, more renewable planet. A single hat does not change the world overnight, so **we decided to release the new Collection 2022 with hats and beanies only made from organic or recycled materials**, trying to raise awareness in the supply chain and to guide people towards an eco-conscious choice.

On the road to sustainable headwear.

ON THE ROAD TO SUSTAINABLE HEADWEAR

The beginning of our path, by introducing the first Oeko-Tex® models, eco-friendly dyeing and a traceability passport for our products.

2018

Launch of the Green Collection in recycled polyester and organic cotton.

2019

Release of the first Sustainability Report, to spread our social and environmental impact.

2020

Publication of our Code of Conduct and launch of a wider Green Collection with the addition of the PolyLANA® fiber.

2021

2022

2025

THE ENTIRE ATLANTIS HEADWEAR COLLECTION WILL BE PRODUCED WITHIN A SUSTAINABLE MINDSET, BY USING CERTIFIED MATERIALS AND PRODUCTION PROCESSES WITH A LOWER IMPACT ON OUR ENVIRONMENT BY 2025.

THE REVOLUTION IS COMING.

100%
SUSTAINABLE
by 2025

OUR RESPONSIBILITY

We care about quality and sustainability.

We are proud to work with certified materials, suppliers, and production processes. We are serious about our sustainable mission and want to prove that we are transparent and trustworthy.

We want our hats to be on people's heads for as long as possible, since high-quality headwear has a longer life cycle.

With different certifications we want to give the consumers reassurance that the products they buy have been accredited by a third party.

That means that **our products are made responsibly and we work together with factories to adhere to strict environmental and social standards.**

DOPE DYEING

Dope dyeing is a dyeing technique typical of recycled polyester fabric. **It involves adding color pigment “upstream”, directly to the melted plastic solution before the fiber is made.**

Unlike traditional processes where yarns are produced and then dyed, with dope dyeing the pigments are trapped inside the plastic after it cools to a solid form, becoming part of the new, strong yarn. With this approach, **dyeing can be done by hot transfer without immersion in water.**

Production impact per 1 kg Woven Polyester Fabric

Material	Energy (MJ)	Water (l)	Waste (kg)	GHG (kg CO ₂)
Virgin Polyester	138	60	0.14-0.57	15
Dope Dyeing Recy Polyester	45-63	0.44	0.20-0.26	12-13

FEATURES

RECYCLED POLYESTER

Recycled polyester (or rPET) is made by breaking down used plastic (usually bottles) into small, thin chips, which are processed and finally turned into yarn.

This is an example of the “circular economy”:

designing something by using recyclable material.

HOW IT'S MADE

1.

Used plastic bottles
are collected and cleaned

2.

Bottles are shredded
into tiny pellets

3.

Pellets are crushed
and melted

4.

The molten plastic is extruded
and stretched into thread

POLYLANA[®]

BELIEVE IN BETTER

Polylana[®] fiber unlocks new potential in fiber creation with reduced environmental impact and enhanced performance capabilities.

Reduces **environmental impact**.

Reduces **water consumption**.

Reduces **energy emission**.

Polylana[®] fiber is an eco-efficient staple fiber with characteristics similar to acrylic and wool fiber, at lower impact.

Polylana[®] fiber can be blended with any natural and synthetic fiber to enhance and adjust performance, look or other characteristics of the final product.

ORGANIC COTTON

Organic cotton is cotton grown with **low environmental impact methods and products, without the use of pesticides and toxic chemical fertilizers** that persist in the cotton itself and in the environment.

It comes from controlled and certified organic crops. With this approach, **water consumption is reduced, soil fertility is maintained and better working and health conditions for farmers are guaranteed.**

After an intensified control of our entire production chain, we can confirm we have no direct business relationships with any manufacturer in **Xinjiang**, the native region of Uyghurs in western China and we are taking significant steps to ensure that there is no indirect involvement of Xinjiang labor in the manufacturing of our products.

**ORGANIC COTTON

RECYCLED COTTON

Recycled cotton is regenerated cotton fiber made from repurposed production scraps or second-hand clothes.

The pieces of fabric are sorted by color, shredded into yarn and then into raw fiber. The result is then spun back into yarns for reuse in other products.

Recycled cotton can find new life in many different textile accessories **using less energy, water, dyeing and can divert many products from landfills.**

The background is a blurred industrial scene. It features a complex structure of dark metal beams and supports. Warm, orange-yellow light emanates from several points, possibly from machinery or work areas, creating a strong contrast with the cooler, dark blue and black tones of the structure. The overall effect is one of a busy, large-scale industrial environment.
